

EBF Big Flange Circulation Pump

Operating Condition

- 1. Apply to heating system
- 2. Max. system pressure: 10bar
- 3. Operation condition: Ambient Temperature: 0°C~40°C Ambient Humidity: 95% Liquid Temperature: -10°C~110°C
Ambient temperature must be lower than liquid temperature, in order to avoid condensate water produced in the interior of stator.
- 4. Liquid : Clean, non-coorosive and non-explosive liquids, without any particle, fiber or mineral oil.
Water/glycol mixtures max. mixing ratio: 1:1
- 5. Dry running no more than 10min.

Model Definition

Example: EBV-EA 25/6 is small circulation pump with cast-iron body, 25inlet/outlet, 6m head, 180mm body length

Feature

Shielding pump, variable frequency adaptive, quiet and efficient

Advantage

- Permanent magnet motor
- Frequency conversion technology
- Memory function
- Constant voltage automatic function
- Constant voltage automatic function
- Use hot and cold water at the same time- -pressurization and circulation.
- Protection function: rotor locked protection, open circuit protection,overheat protection,short circuit protection

Application

Air conditioning, refrigeration secondary system
Combined heating and circulation

EBF-EA 40/600

EBF-EA 65/600

EBF-EA 50/600

	Manual Mode		Light for each speeds
	Proportational Pressure Mode		Mode button
	Constant Pressure Mode		Button for speed change
	ECO Mode		Power display Light

Performance Table

Model	Connection size (Inch)	Rated flow (m³/h)	Rated head (m)	Max. head (m)	Rated power (W)	Input power (W)
